Avaya Communicator for Android is a “softphone” application that allows you to place and receive phone calls from your internet connected Android device. It allows you to use Voice-Over-IP technologies to use your Android phone or tablet as an office phone without having to rely on your cell-phone minutes.

**BENEFITS**

- Connect to and use your existing Avaya Campus PBX telephone number from the Android phone or tablet you already have.
- Answer, place, transfer and conference calls using the application with full caller-id support.
- Place calls without using your cell phone minutes. Long-distance calls are billed to your department phone bill.
- Answer and place calls via Wi-Fi where you don’t have cellular service.
- Control features such as EC-500, Call Forwarding, etc. right from the device.
- Use the application in “EC-500” if you have limited data capabilities. Switch easily and quickly between the two modes.

**KEY FEATURES**

- Turn on and off critical phone features such as EC-500, Send-All-Calls and Call Forwarding
- Use the phone in EC-500 or VoIP mode and switch easily between the modes depending on your data service capability.
- See caller-id information (including name) from campus callers.
- *Free* feature for all Avaya Campus PBX users.
  - Requires a broadband internet connection. Quality may be affected by poor internet connections.
  - Compatible with many Android phones running Android 4.2 or later.
  - Works with most Bluetooth headsets.
