Avaya one-X Flare is a “softphone” application that allows you to place and receive phone calls from your internet connected Apple iPad. It allows you to use Voice-Over-IP technologies to use your Apple device as an office phone without having to rely on your desk phone, cellphone, or cell-phone minutes.

**Benefits**

- Connect to and use your existing Avaya Campus PBX telephone number from the Apple iPad device you already have.
- Use your iPad as a speakerphone anywhere Wi-Fi access is available.
- Answer, place, transfer and conference calls using the application with full caller-id support.
- Place calls without using your cell phone minutes. Long-distance calls are billed to your department phone bill.
- Lookup information from the integrated MSU People Search directory.
- Instant Message and video chat with other Avaya one-X Communicator users.

**Key Features**

- Integrates with the MSU People Search Directory and your phone’s contact list for phone number lookups.
- Use presence and instant messaging to connect with other remote workers.
- Turn on and off critical phone features such as EC-500, Send-All-Calls and Call Forwarding.
- Free feature for all Avaya Campus PBX users.
- Requires a broadband internet connection. Quality may be affected by poor internet connections.
- Compatible with all Apple iPad versions.
- Works with most Bluetooth headsets. Without a Bluetooth headset, works in speakerphone mode.
