*Corrections & Additions:

MSU has also changed to the Association of Physical Plant Administrators of Universities and Colleges (APPA) method of calculating gross building square footages and cubic footages exclusively. Conversion to this system makes MSU's data more comparable with other midwest Universities.

The changes in 1979 square footages and cubic footages precipitated by the conversion to the APPA Gross Calculation Method are as follows:

Square Footage: + 994,838

Cubic Footage: + 13,362,680

These increases are included in the totals shown above.

The revisions for 1980 also include all buildings which for one reason or another were previously omitted.
