MSU Kellogg Biological Station – LTER FIELD LAB (0727V)

Located at
10378 North 40th Street, Hickory Corners, MI 49060

Project Overview

This Design-Build project involves the construction of a post frame building addition to provide an archival storage (64x40) and work area, and to provide a mud room. The overall addition dimensions are to be 64x40 and match the existing roof and eave height. This is a prevailing wage project.
